

DESTRUCTION PROCEDURE

To properly destroy the affected helmet, cut the chin straps and get the required photos following these steps:

1. Turn the helmet over to access the chin straps.

4. Cut straps in location as indicated.

2. Remove cheek pads to expose chin straps.

3. Locate the certification tag on the inside of the helmet. Verify the certification tag has "Tactical 2.0" for the model and the size label will have a "Y" before the size to make sure the helmet is affected by this recall.

5. Three photos are required for photo submission. Take a photo capturing both straps cut from the helmet, a photo clearly showing certification tag inside the helmet, and a photo of the helmet.

IMPORTANT

The certification tag must be clearly showing in the photo and is readable or you will be asked to retake it to receive a replacement helmet or credit.

509 for Polaris Youth Tactical 2.0 Helmet in Gray Shown

6. For Youth Tactical 2.0 helmets with Polaris AND 509 branding, send the photos to **Owner.Connections@Polaris.com**
