PICKING THE RIGHT WINDSHIELD

The 13.7 In. Flare Windshield will give your bike a style boost while the 11.3 In. Windscreen will give your Chieftain a more low-profile look. For riders looking for wind protection, a windshield that stops shortly below eye level will prevent you from looking through bug splatter, while directing air over your head. For touring riders, we recommend the 21 In. Touring Windshield.
