Preparation: Check your UTV for any sharp surfaces or corners that could tear your UTV cover prior to installation onto the vehicle. Secure cloth, foam, or other protective material around sharp objects prior to assembling the cover onto the UTV. Ensure the vehicle has cooled down prior installing onto the vehicle.

Installation: Position the cover over the UTV with Kolpin brand facing forward on the machine. Ensure the elastic seam is positioned around the perimeter of the vehicle tires to help secure the cover. Attach the straps underneath the UTV to secure the cover during windy conditions. Snugly tighten strap to minimize movement from the wind, however take caution to not over tighten.

Cleaning: Clean your cover with a soft sponge and warm water. Allow to air dry. Do not use detergent, machine wash, or tumble dry.
