PACK FOR EVERY ADVENTURE

Equip your Polaris XPEDITION with Polaris Engineered storage accessories to pack all your essentials for every outdoor adventure. The versatile lineup includes all-new, easy-to-install Lock & Ride MAX accessories — like a bed extender, spare tire carrier and rear storage box — that offer limitless ways to customize your vehicle's storage capabilities.

Plus, we've partnered with Rhino-Rack® to deliver premium roof and bed rack solutions. These racks deliver increased storage capacity and allow you to elevate your adventure with item-specific mounts to transport items including kayaks, fishing rods, traction boards and more.

## INTRODUCING

MAINTENANCE TIP

BREAK-IN PERIOD

The break-in period for your new Polaris XPEDITION is the first 25 hours of operation, or the time it takes to use the first two tanks of fuel. No single action on your part is as important as a proper break-in period. Careful treatment of a new engine will result in more efficient performance and longer life for the engine.

SEE OUR LATEST MAINTENANCE TIPS AT [XPEDITION.POLARIS.COM/EN-US/SELF-HELP](https://xpedition.polaris.com/en-us/self-help)

AIR FILTER

A clogged air filter can restrict air flow to the engine leading to reduced engine performance, engine life or catastrophic failure.

7083049

BRAKE PADS

Maintaining and/or replacing brakes are critical to the safety and functionality of a vehicle. Brake pads should be checked for wear and oil or grease (petroleum products) contamination and brake discs should be checked for cracks, excessive corrosion or warping.

Front: 2211845

Rear: 2211852

HALF SHAFT

Check for tears and punctures in the boot, which can lead to CV joint wear that can contribute to axle failure.

Front Kit: 2211710

Rear Kit: 2211711

DRIVE BELT 3211186

Polaris Engineered belts deliver unmatched performance for your off-road vehicle. Developed and tested on all our engines for all environments and conditions. Check your belt for delamination, hour glassing and glazing.

BREAK-IN PERIOD

- Use lower gear (if available) while varying speeds and avoid wide open throttle for 5-10 miles / 8-16 km
- If no low gear is available, vary at moderate speeds while avoiding wide open throttle for 50 miles / 80 km

OUR INVESTMENT

- 40,000+ miles / 64,000+ km of field testing
- Thousands of dyno hours
- 18+ months of development (13,000+ design hours) per belt
- 1,500+ vehicle validation hours
- Collaboration with powertrain and clutch engineers

YOUR ADVANTAGE

- No clutch recalibration
- Less wear and tear due to heat
- Ensure maximum vehicle performance
- More time riding, less time wrenching
- Produced in collaboration with powertrain and clutch engineers to ensure a perfect fit, maximum performance and ultimate durability

OIL FILTER

Change oil filters with every oil change to provide the best engine protection and keep the engine operating at peak performance.

OE: 2540086

HD: 2522485

BATTERY

To ensure a battery maintains its level of charge when unused for extended periods of time or during freezing weather, the battery should be connected to a battery charger (see P. 65). Be sure to check for corrosion from the terminals to the ends of the cables.

# TIRE SEALANT

24 X 7 COVERAGE | BE PREPARED FOR ANYTHING

## HOW IT WORKS

- 1 Tire sealant remains liquefied inside the tire until a leak develops in the tire or wheel.
- 2 Once a leak occurs, the tire sealant rushes out of the tire and quickly creates a permanent solid plug, maintaining tire pressure so you can continue your ride.

### HOW MUCH DO YOU NEED?

$$\text{TIRE HEIGHT (IN.)} \times \text{TIRE WIDTH (IN.)} / 5 = \text{OUNCES REQUIRED PER TIRE}$$

VISIT [POLARIS.COM/TIRESEALANTCHART](https://polaris.com/tiresealantchart) TO LEARN MORE

### PREMIUM TIRE SEALANT

- Instantly seals and repairs rim, bead leaks and punctures up to .25" on standard tires and .75" on heavy ply tires
- Helps seal the tire bead against the wheel
- Creates permanent repair, helps maintain air pressure for the life of the tire
- 100% water soluble for easy cleanup
- Remains fluid and effective in temperatures down to -45° F
- Will not rust, corrode or pit wheels
- Easily installed through existing tire valve stem with valve core removed
