

TACKLE THE TOUGHEST TERRAIN

Operating in cold weather is not for the faint of heart. When executing missions, patrols, and expeditions in cold environments, users must operate effectively in frigid temps and treacherous conditions. Expand your reach with unprecedented performance and versatility with Polaris' Arctic mobility vehicle options.

Rubber track conversion to all 4 wheel hubs.

TAKING PERFORMANCE TO NEW PLACES

Specialized teams around the world are turning to the MRZR Alpha with enclosed cab and tracks and military snowmobiles to access terrain inaccessible with larger and heavier military tactical wheeled vehicles. When used together, each of these vehicles plays a unique role in expanding mission capabilities for reconnaissance, patrols, and transport of personnel and equipment—all while adding operator protection from the elements.

MISSION SETS

RECONNAISSANCE

With blackout mode, infrared lighting, and camouflaged exteriors, our military snowmobiles are ideal for reconnaissance—especially the lightweight and agile Military 850 PRO RMK 155.

PATROL

Keep watch over a wider variety of terrains for longer with the improved performance, control, versatility, and comfort found in all of our Arctic mobility vehicles.

PERSONNEL AND EQUIPMENT TRANSPORT

No matter if you're pulling trailers, moving cargo, or transporting personnel, our military vehicles are designed to move more payload in a wide variety of cold weather conditions.
