RANGER **PRO SHIELD™** CAB SYSTEM

THE TIGHTEST SEALING CAB

With the profile channels engineered into the roll cage, body plastics molded to seal and cab accessories designed to keep the elements out, the *RANGER* Pro Shield™ Cab System offers an industry-leading, 3x better dust seal than the competition.

LOCK & RIDE

CARGO BOX VERSATILITY

Lock & Ride® mounting locations allow for limitless customization to let you work the way you want.

PLUG & PLAY ELECTRICAL

A revolution in electrical accessory integration, the Polaris Pulse™ Electrical System allows for a simple plug & play approach for adding power to Polaris Engineered Accessories™.

ALL-SEASON PROTECTION

RANGER

Look for the **RANGER PRO SHIELD™** Logo for the 4 components to customize your **RANGER®** with the industry's tightest sealing cab.

A FRAME DESIGNED FOR A CAB

All **RANGER®** cab components fit perfectly to the contours of the **RANGER XP® 1000** profile tube cab frame, floor and body panels, allowing for a 360° gasket seal, seamless fit and installation providing unprecedented protection from the elements.

POLARIS ENGINEERED™ ADVANTAGES

SEALED COVERAGE

Just as roof shingles overlap for seamless coverage, roofs extend over other cab components to add even more protection against the elements, delivering the best fit - and the best seal.

KEEP MOISTURE MOVING

Keep precipitation moving with integrated roof water channels that direct water away from the cab even when you're stationary.

PREMIUM FINISH & QUIETER RIDE

Roof liners provide a clean look by hiding wiring, and absorb noise for a quieter ride.

REVOLUTIONARY INSTALLATION

Roofs install directly into mounting points in the cab frame.

OFF-ROAD GRADE AUDIO

When you research audio solutions for Polaris® RANGER®, you'll see manufacturers bragging about how their audio equipment is "Marine Grade". Or worse yet, you'll discover for yourself that they are repackaged components built for automotive applications. MB Quart®, combined with Polaris®, engineers Off-Road Grade Audio equipment that's proven to deliver the loudest, crispest sound in the harshest conditions. OVERHEAD PROTECTION

TO SHIELD AGAINST DRIVING RAIN OR THE BLISTERING SUN, a roof is the first must-have of the Polaris Engineered™ cab components. Choose from poly, steel or canvas, and get on your way with protective peace of mind.

POLY

Lightweight, durable and impact-resistant. A poly roof can take the abuse of a tough trail and still protect.

ROOF LINERS

Get a touch of premium comfort, reduce cab noise and hide wiring. Roof liners are included with all premium poly roofs.

STEEL

For the ultimate in strength and protection.

CANVAS

Lightweight and easy to clean. Canvas roofs install simply and store easily.

POLARIS ENGINEERED™
ADVANTAGES

SEALED COVERAGE

Just as roof shingles overlap for seamless coverage, roofs extend over other cab components to add even more protection against the elements, delivering the best fit - and the best seal.

KEEP MOISTURE MOVING

Keep precipitation moving with integrated roof water channels that direct water away from the cab even when you're stationary.

**PREMIUM FINISH &
QUIETER RIDE**

Roof liners provide a clean look by hiding wiring, and absorb noise for a quieter ride.

**REVOLUTIONARY
INSTALLATION**

Roofs install directly into mounting points in the cab frame.

ULTIMATE CLARITY WITH GLASS

FOR THE ULTIMATE IN SCRATCH RESISTANCE AND CLARITY, nothing beats glass. It has the most optical clarity of any windshield material, so you can keep riding regardless of the weather. Reduce the dust swirl from the windshield and roof by adding a rear panel to keep the cab clean and comfortable.

TEMPERED SAFETY GLASS

For the ultimate in scratch resistance, tempered safety glass is the top choice. Optically, it is the clearest glass available, and because it is tempered, it's shatterproof.

AIRTIGHT GASKET SEAL

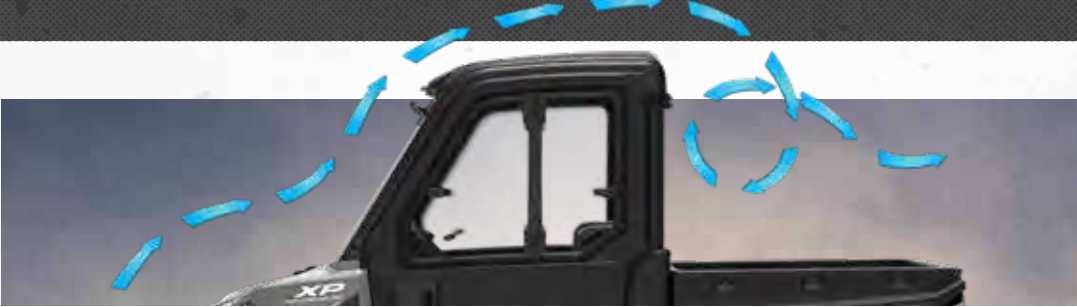

RANGER® windshields feature a 360° gasket seal, preventing moisture and dust from entering the cab.

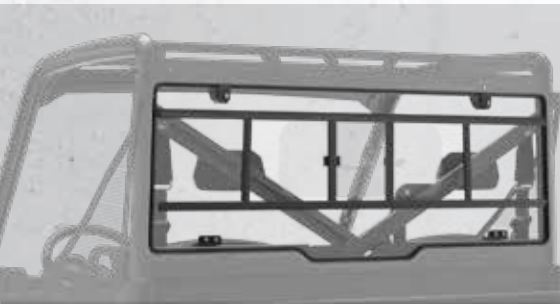

MULTI-FUNCTION FEATURES

Venting options are useful for controlling airflow into the cab. This allows you to regulate the temperature inside. A low-profile exterior framework on the windshields gives an unobstructed field of vision.

REAR PANELS

REDUCE IN-CAB DUST SWIRL BY ADDING A REAR PANEL
With a windshield and roof installed, turbulent air develops behind the cab. Add a rear panel to reduce dust intrusion from this swirl.

REVOLUTIONARY INSTALLATION

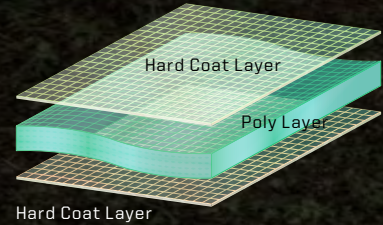

Every Lock & Ride® windshield utilizes a unique clamp that secures your windshield with the perfect amount of hold for rough trail conditions, yet still allows for easy, tool-less removal.

DURABLE POLY PROTECTION

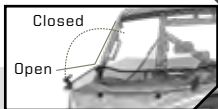

LIGHT AND FLEXIBLE, poly is impact-resistant, providing long-term value and protection. Whether you choose hard coat or general poly, you can hit the trail or job site with confidence, protection, and durability.

HARD COAT POLY

Poly windshields covered by hard coat provide **30x MORE** scratch resistance than any standard poly windshields.

REDUCE IN-CAB DUST SWIRL BY ADDING A REAR PANEL

With a windshield and roof installed, turbulent air develops behind the cab. Add a rear panel to reduce dust intrusion from this swirl.

VENTING OPTIONS

Venting options are useful for controlling airflow into the cab. This allows you to regulate the temperature inside.

THE POLARIS ENGINEERED™ ADVANTAGE

LOCK & RIDE

INSTALLATION

With the integrated Lock & Ride® attachment points, you can easily drive up to the plow frame, attach and be plowing in moments.

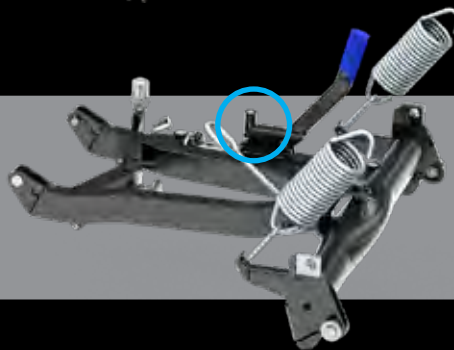

ROBUST PLOW FRAME

Constructed of heavy-duty steel with e-coated rust protection, giving you a durable system you can rely on season after season.

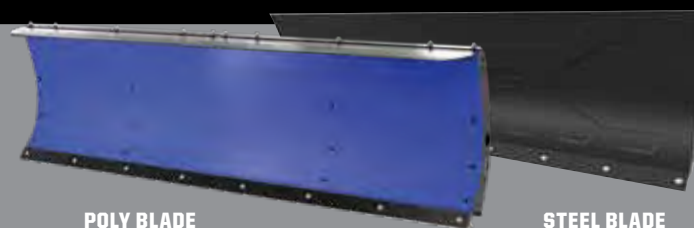

SHEAR PIN PROTECTION

Engineered to protect your vehicle, shear pins act as a fail-safe point in the instance of accidental collision or over-exertion of the plow system.

BLADE MATERIAL

Durable poly and steel blades are designed to push more. Choose a steel blade for longevity and increased rigidity or a lightweight non-stick, poly blade that's easier on plowing surfaces.

POLY BLADE

PRO ARMOR®

Polaris® & Pro Armor® developed a deep partnership thanks to having similar histories and a passion for producing products that enhance vehicle performance. Each wheel & tire Pro Armor® designs and engineers for Polaris® Off-Road Vehicles performs perfectly in the intended environment for its intended use. Developed, tested and produced in partnership so you can tackle the terrain ahead.

TRIPLE-BELTED SIDEWALLS

Sidewalls can be a vulnerable area of any off-road tire. Thanks to reinforced construction in this critical area, Pro Armor® resists when others fail.

10-PLY

Pro Armor® builds the toughest tires to keep you running when the terrain turns tough. A higher ply rating means added protection.

INNOVATION

A dual-durometer design allows the tire to wear better with softer outer lugs and harder inner lugs.

THE RIGHT TIRES

FOR WORK. Pro Armor® Utility Tires are built to provide exactly what you need for your application. Need a high-kilometer work horse? We've got it. Need a turf-friendly tire with low-impact? We've got those too. Looking for the most extreme puncture resistance? Check.

"We use our RANGER® every day around the farm. We put the Pro Armor HARVESTER® Tires on last fall, We love them! We have received better traction as well as a gentler and quieter ride compared to the stock tires whether around the yard or out to the fields. They are so gentle on the lawn; we don't worry about driving the kids anywhere around the farm. We've had them on for a year and can't even see wear and tear, these are the best tires for my RANGER."

2 EASY STEPS 1) CHOOSE YOUR MOUNT 2) CHOOSE YOUR TRACK

PROSPECTOR PRO® TRACK SYSTEM

- Polaris® exclusive optimized hub geometry that minimizes feedback and eases steering effort
- Flexible lug design for the highest level of deep snow performance by lifting up in deep snow as opposed to digging down
- Lightweight design with slight weight reduction over Camoplast® kit provides for better flotation, eases steering effort and provides better vehicle control

KEEP IT ICE COLD

POLARIS NORTHSTAR® COOLERS can survive just about anything - from extreme heat to a nasty tumble off a vehicle. So when we say ice will stay cold for hours on end and anything inside will stay locked up tight, we mean it.

GRIZZLY TESTED. POLARIS® APPROVED.

This cooler is IGBC-approved, meaning it withstands the power expended by a typical grizzly bear if it was trying to get inside. Seriously, there are experts who know what a grizzly is capable of doing, and they certify that the Polaris Northstar® Cooler can take it.

POLARIS ENGINEERED™ ADVANTAGES

SEALED COVERAGE

Just as roof shingles overlap for seamless coverage, roofs extend over other cab components to add even more protection against the elements, delivering the best fit and seal.

KEEP MOISTURE MOVING

Keep precipitation moving with integrated roof water channels that direct water away from the cab, even when you're stationary.

REVOLUTIONARY INSTALLATION

Lock & Ride® roofs install directly into mounting points in the cab frame, and are easily installed or removed without tools.

OVERHEAD PROTECTION

TO SHIELD AGAINST DRIVING RAIN OR THE BLISTERING SUN, a roof is the first must-have of the Polaris Engineered Accessories™ line-up. Choose from poly or steel and know that you are protected from the elements with a seamless integrated roof.

POLY

Lightweight, durable and impact-resistant. A poly roof can take the abuse of a tight trail and still protect.

SPORT ROOF - POLY TOP SELLER

- Provides shade, superior overhead protection

ENGINEERED TO MAXIMIZE THE LIFE OF YOUR RIDE

All Polaris® fluids—from AGL to Demand Drive Fluid—are developed for your vehicle. Trust the only fluids perfectly engineered for your needs.

SPECIFIC NEEDS, **SPECIFIC OILS**

Polaris® invests millions in engine development, and part of that investment is making sure its lubricants—critical to engine performance—are the right formula for your specific engine. The amount of testing data and engineering resources used in developing Polaris® lubricants would overwhelm an aftermarket company. Therefore, the aftermarket must produce an oil to an industry-wide standard that must account for a variety of operating parameters.

PS-4 is designed specifically for Polaris® 4-cycle engines and has high film strength and wear protection under extreme loads and temperatures. Exclusive anti-wear additives protect engine parts with extra rust and corrosion protection.

Everything needed to change your oil! The correct filter & amount of oil for your vehicle.

TIRE SEALANT

HOW IT WORKS

Tire sealant remains liquefied inside your tire until a leak develops in the tire or wheel.

Once a leak occurs, the tire sealant rushes out of the tire and quickly creates a permanent solid plug.

The plug maintains the pressure of the tire so you can continue your ride.

PREMIUM TIRE SEALANT

- Instantly seals and repairs rim, bead leaks, and punctures up to 1/4" on standard tires, and 3/4" on heavy ply tires
- Helps maintain air pressure for the life of the tire
- Helps seal the tire bead against the wheel
- 100% water soluble for easy cleanup
- Will not rust, corrode, or pit wheels
- Creates permanent repair
- Remains fluid and effective in temperatures down to -45° F
- Easily installed through existing tire valve stem with valve core removed

HOW TO INSTALL

- Remove wheel and axle nut
- Remove brake caliper, hub, tie rod, & upper & lower ball joints
- Remove old boot & clean joint
- Spread silicone lube on entire cone tool. Slide boot over cone tool, large end first. See package for outer boot instructions.
- Empty the bag of grease into the CV joint/boot, clean sealing points & install clamps
- Reassemble tie rod, ball joints, brake caliper, axle nut, tire & wheel

Refer to your owner's manual for further instructions and torque specifications.

*Designed for temporary CV boot repair. Purchase the OEM CV Boot for a permanent repair.

FOR THE LIFE OF YOUR RIDE

AIR FILTERS

Critical to engine performance and reliability. A clogged air filter can restrict air flow to the engine leading to reduced engine performance. Dirt and debris ingestion can damage the engine leading to reduced engine life or catastrophic failure. Polaris® recommends changing the vehicle's air filter at the specified intervals outlined in the owner's manual, which may be shorter if your vehicle is subject to severe conditions.

BRAKE PADS

Check your brakes if you are close to the recommended service interval, hear grinding when applying the brakes, your vehicle is taking longer to stop or if you have to apply more pressure to your pedal to engage the brakes. Check the brake discs for signs of cracks, excessive corrosion or warping.

If the brake pads are contaminated with oils or grease (petroleum products), brake pads have to be discarded and replaced.

Discs need to be cleaned with brake cleaner or alcohol based cleaner only.

THE KEY TO KEEPING YOUR POLARIS® OFF-ROAD VEHICLE PERFORMING as well as the day you brought it home is proper maintenance. Items like belts, filters, and batteries represent only a few of these critical items engineered specifically by Polaris®.

DRIVE BELTS

Polaris Engineered™ belts deliver unmatched performance for your off-road vehicle. Developed and tested on all our engines for all environments and conditions. Check your belt for delamination, hour glassing and glazing.

OIL FILTERS

Change oil filters with every oil change to provide the best protection for your engine. Superior engine protection keeps your engine operating at peak performance. Be sure to follow the suggested service intervals for oil/oil filter changes.

BATTERIES

Never leave a battery unattended during the storage season. To ensure your battery maintains its level of charge when unused for extended periods of time or during freezing weather, the battery should be connected to a BatteryMINDER™. Be sure to check for corrosion from the terminals to the ends of the cables.

MAINTENANCE TIP

BREAK-IN PERIOD

The break-in period for your new *RANGER* is the first 25 hours of operation, or the time it takes to use the first two tanks of fuel. No single action on your part is as important as a proper break-in period. Careful treatment of a new engine will result in more efficient performance and longer life for the engine. Perform the listed procedures carefully.

NOTICE: Excessive heat build-up during the first three hours of operation will damage close-fitted engine parts. Do not operate at full throttle or high speeds for extended periods during the first three hours of use.

POWER[®] GENERATORS

POWERFUL, PORTABLE, DURABLE.

Portable, quiet power great for remote locations. Tested to be tough, these generators are an excellent addition to any trip.

WHICH GENERATOR FITS YOUR NEEDS?

1 Add up the running watts of everything you might power at the same time.

2 Pick the device with the highest running watts and add its starting watts to the previous total.

3 Select a generator with a slightly higher wattage.

BATTERY MAINTENANCE TIPS

Extend your battery life with a BatteryMINDER® and these tips.

1. Store batteries in a cool, dry location.
2. Check that the battery connections are tight. Cables should not be able to be rotated or shifted by hand.
3. If your battery has a drain tube, make sure it is free of clogs.
4. Clean your battery - use a soft brush to scrub the top of the battery. Use baking soda to remove grease.
5. Connect a BatteryMINDER® after using your vehicle even if the vehicle is in regular use.
