POLARIS ENGINEERED™ ADVANTAGES

SEALED COVERAGE

Just as roof shingles overlap for seamless coverage, roofs extend over other cab components to add even more protection against the elements, delivering the best fit - and the best seal.

KEEP MOISTURE MOVING

Keep precipitation moving with integrated roof water channels that direct water away from the cab even when you're stationary.

PREMIUM FINISH & QUIETER RIDE

Roof liners provide a clean look by hiding wiring, and absorb noise for a quieter ride.

REVOLUTIONARY INSTALLATION

Roofs install directly into mounting points in the cab frame.

ULTIMATE CLARITY WITH GLASS

FOR THE ULTIMATE IN SCRATCH RESISTANCE AND CLARITY, nothing beats glass. It has the most optical clarity of any windshield material, so you can keep riding regardless of the weather. Reduce the dust swirl from the windshield and roof by adding a rear panel to keep the cab clean and comfortable.

TEMPERED SAFETY GLASS

For the ultimate in scratch resistance, tempered safety glass is the top choice. Optically, it is the clearest glass available, and because it is tempered, it's shatterproof.

POLARIS ENGINEERED™ ADVANTAGES

SEALED COVERAGE

Just as roof shingles overlap for seamless coverage, roofs extend over other cab components to add even more protection against the elements, delivering the best fit - and the best seal.

KEEP MOISTURE MOVING

Keep precipitation moving with integrated roof water channels that direct water away from the cab even when you're stationary.

PREMIUM FINISH & QUIETER RIDE

Roof liners provide a clean look by hiding wiring, and absorb noise for a quieter ride.

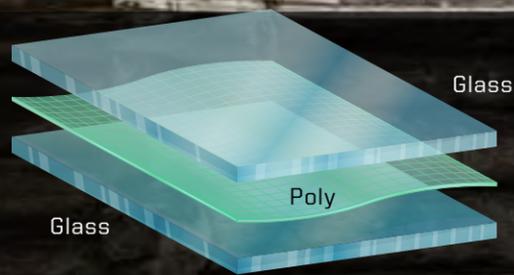

REVOLUTIONARY INSTALLATION

Roofs install directly into mounting points in the cab frame.

ULTIMATE CLARITY WITH GLASS

FOR THE ULTIMATE IN SCRATCH RESISTANCE AND CLARITY, nothing beats glass. It has the most optical clarity of any windshield material, so you can keep riding regardless of the weather. Reduce the dust swirl from the windshield and roof by adding a rear panel to keep the cab clean and comfortable.

TEMPERED SAFETY GLASS

For the ultimate in scratch resistance, tempered safety glass is the top choice. Optically, it is the clearest glass available, and because it is tempered, it's shatterproof.

POLARIS ENGINEERED™ ADVANTAGES

AIRTIGHT GASKET SEAL

RANGER® windshields feature a 360° gasket seal, preventing moisture and dust from entering the cab.

MULTI-FUNCTION FEATURES

Venting options are useful for controlling airflow into the cab. This allows you to regulate the temperature inside. A low-profile exterior framework on the windshields gives an unobstructed field of vision.

REVOLUTIONARY INSTALLATION

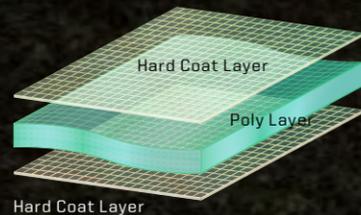

Every Lock & Ride® windshield utilizes a unique clamp that secures your windshield with the perfect amount of hold for rough trail conditions, yet still allows for easy, tool-less removal.

DURABLE POLY PROTECTION

LIGHT AND FLEXIBLE, poly is impact-resistant, providing long-term value and protection. Whether you choose hard coat or general poly, you can hit the trail or job site with confidence, protection, and durability.

HARD COAT POLY

Poly windshields covered by hard coat provide **30x MORE** scratch resistance than any standard poly windshields.

Polaris® & Pro Armor® developed a deep partnership thanks to having similar histories and a passion for producing products that enhance vehicle performance. Each wheel & tire Pro Armor® designs and engineers for Polaris® Off-Road Vehicles performs perfectly in the intended environment for its intended use. Developed, tested and produced in partnership so you can tackle the terrain ahead.

TRIPLE-BELTED SIDEWALLS

Sidewalls can be a vulnerable area of any off-road tire. Thanks to reinforced construction in this critical area, Pro Armor® resists when others fail.

10-PLY

Pro Armor® builds the toughest tires to keep you running when the terrain turns tough. A higher ply rating means added protection.

INNOVATION

A dual-durometer design allows the tire to wear better with softer outer lugs and harder inner lugs.

3,000+ MILE RATED

Pile on the miles with Pro Armor® tires. Every tire is designed and constructed with longevity in mind, you are assured long life and performance.

THE RIGHT TIRES

FOR WORK. Pro Armor® Utility Tires are built to provide exactly what you need for your application. Need a high-mileage work horse? We've got it. Need a turf-friendly tire with low-impact? We've got those too. Looking for the most extreme puncture resistance? Check.

"We use our RANGER every day around the farm. We put the Pro Armor HARVESTER Tires on last fall. We love them! We have received better traction as well as a gentler and quieter ride compared to the stock tires whether around the yard or out to the fields. They are so gentle on the lawn; we don't worry about driving the kids anywhere around the farm. We've had them on for a year and can't even see wear and tear, these are the best tires for my RANGER."

SEALED COVERAGE

Just as roof shingles overlap for seamless coverage, roofs extend over other cab components to add even more protection against the elements, delivering the best fit and seal.

KEEP MOISTURE MOVING

Keep precipitation moving with integrated roof water channels that direct water away from the cab, even when you're stationary.

REVOLUTIONARY INSTALLATION

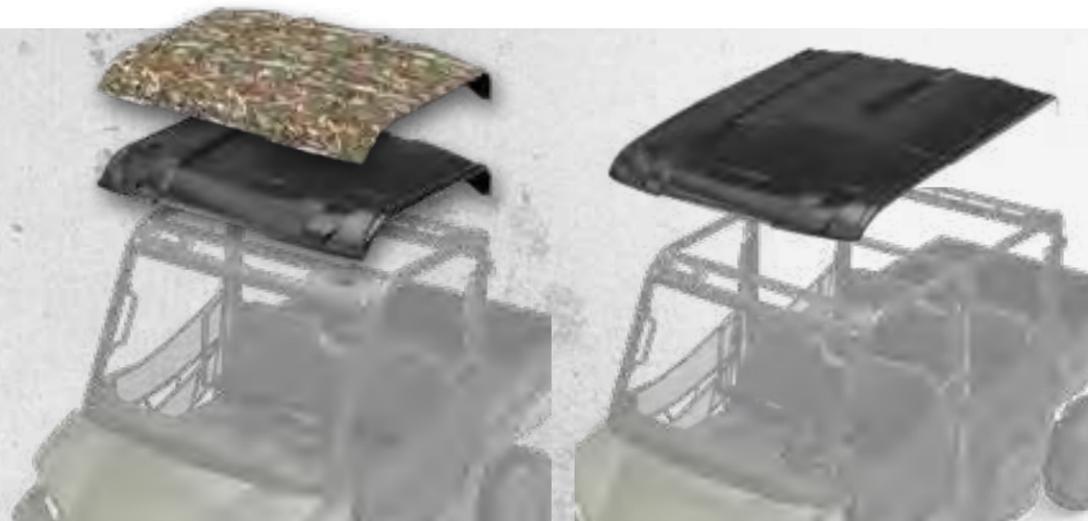

Lock & Ride® roofs install directly into mounting points in the cab frame, and are easily installed or removed without tools.

OVERHEAD PROTECTION

TO SHIELD AGAINST DRIVING RAIN OR THE BLISTERING SUN, a roof is the first must-have of the Polaris Engineered Accessories™ line-up. Choose from poly or steel and know that you are protected from the elements with a seamless integrated roof.

POLY

Lightweight, durable and impact-resistant. A poly roof can take the abuse of a tight trail and still protect.

ENGINEERED TO MAXIMIZE THE LIFE OF YOUR RIDE

All Polaris® fluids—from AGL to Demand Drive Fluid—are developed for your vehicle. Trust the only fluids perfectly engineered for your needs.

SPECIFIC NEEDS, SPECIFIC OILS

Polaris® invests millions in engine development, and part of that investment is making sure its lubricants—critical to engine performance—are the right formula for your specific engine. The amount of testing data and engineering resources used in developing Polaris® lubricants would overwhelm an aftermarket company. Therefore, the aftermarket must produce an oil to an industry-wide standard that must account for a variety of operating parameters.

PS-4 is designed specifically for Polaris® 4-cycle engines and has high film strength and wear protection under extreme loads and temperatures. Exclusive anti-wear additives protect engine parts with extra rust and corrosion protection.

Everything needed to change your oil! The correct filter & amount of oil for your vehicle.

TIRE SEALANT

HOW IT WORKS

Tire sealant remains liquefied inside your tire until a leak develops in the tire or wheel.

Once a leak occurs, the tire sealant rushes out of the tire and quickly creates a permanent solid plug.

The plug maintains the pressure of the tire so you can continue your ride.

PREMIUM TIRE SEALANT

- Instantly seals and repairs rim, bead leaks, and punctures up to 1/4" on standard tires, and 3/4" on heavy ply tires
- Helps maintain air pressure for the life of the tire
- Helps seal the tire bead against the wheel
- 100% water soluble for easy cleanup
- Will not rust, corrode, or pit wheels
- Creates permanent repair
- Remains fluid and effective in temperatures down to -45° F
- Easily installed through existing tire valve stem with valve core removed

FOR THE LIFE OF YOUR RIDE

THE KEY TO KEEPING YOUR POLARIS® OFF-ROAD VEHICLE PERFORMING as well as the day you brought it home is proper maintenance. Items like belts, filters, and batteries represent only a few of these critical items engineered specifically by Polaris®.

AIR FILTERS

Critical to engine performance and reliability. A clogged air filter can restrict air flow to the engine leading to reduced engine performance. Dirt and debris ingestion can damage the engine leading to reduced engine life or catastrophic failure. Polaris® recommends changing the vehicle's air filter at the specified intervals outlined in the owner's manual, which may be shorter if your vehicle is subject to severe conditions.

BRAKE PADS

Check your brakes if you are close to the recommended service interval, hear grinding when applying the brakes, your vehicle is taking longer to stop or if you have to apply more pressure to your pedal to engage the brakes. Check the brake discs for signs of cracks, excessive corrosion or warping.

If the brake pads are contaminated with oils or grease (petroleum products), brake pads have to be discarded and replaced.

Discs need to be cleaned with brake cleaner or alcohol based cleaner only.

DRIVE BELTS

Polaris Engineered™ belts deliver unmatched performance for your off-road vehicle. Developed and tested on all our engines for all environments and conditions. Check your belt for delamination, hour glassing and glazing.

OIL FILTERS

Change oil filters with every oil change to provide the best protection for your engine. Superior engine protection keeps your engine operating at peak performance. Be sure to follow the suggested service intervals for oil/oil filter changes.

BATTERIES

Never leave a battery unattended during the storage season. To ensure your battery maintains its level of charge when unused for extended periods of time or during freezing weather, the battery should be connected to a BatteryMINDER®. Be sure to check for corrosion from the terminals to the ends of the cables.

MAINTENANCE TIP

BREAK-IN PERIOD

The break-in period for your new RANGER® is the first 25 hours of operation, or the time it takes to use the first two tanks of fuel. No single action on your part is as important as a proper break-in period. Careful treatment of a new engine will result in more efficient performance and longer life for the engine. Perform the listed procedures carefully.

NOTICE: Excessive heat build-up during the first three hours of operation will damage close-fitted engine parts. Do not operate at full throttle or high speeds for extended periods during the first three hours of use.
