GLACIER®

PLOW SYSTEM

When you have the power of a Glacier® Pro Plow System on your machine, you can truly take command of clearing snow and moving whatever you need to. Find the blade that fits your needs and you'll make quick work of even the heaviest jobs.

THE POLARIS ENGINEERED™ ADVANTAGE

INSTALLATION

30 seconds: Drive up, clip in, lock down, and go – the integrated Polaris Engineered™ Glacier® Plow System simplifies plowing.

CONVENIENCE

Lift and angle adjustments can be made from the driver's seat.

ANGLE YOUR BLADE RIGHT FROM YOUR SEAT WITH THE GLACIER® PRO PLOW HYDRAULIC ANGLE SYSTEM

ROBUST FRAME

A plow system is only as strong as its frame, and Polaris Engineered™ plow frames have a wide frame to withstand the rigors of heavy plowing.

DURABILITY

Available in strong stamped steel or corrosion-resistant poly materials, Polaris Engineered™ plow blades cover a large surface area for quick snow removal.

PRO ARMOR®

TIRES

Polaris® and Pro Armor® developed a deep partnership thanks to having similar histories and passion for producing products that enhance vehicle performance. Each wheel and tire Pro Armor® designs and engineers for Polaris® off-road vehicles perform perfectly in the intended environment for its intended use. Developed, tested, and produced in partnership so you can tackle the terrain ahead.

10-PLY

Pro Armor® builds the toughest tires to keep you running when the terrain turns tough. A higher ply rating means added protection. Choose your tire and ply rating based on use and overall performance needs.

DUAL COMPOUNDS

You don't ride or drive in just one type of terrain, so Pro Armor® builds certain tires with multiple wear zones. A dual-durometer design allows the tire to wear better with softer outer lugs and harder inner lugs.

TRIPLE-BELTED SIDEWALLS

Sidewalls can be a vulnerable area of any off-road tire. Rocks jump out at your machine and tear into sidewalls. Thanks to reinforced construction in this critical area, Pro Armor® resists when others fail.

TORTURE-TESTED TOUGH

Pro Armor® pushes beyond normal-use testing, and blows by extreme-use testing. The duty cycle developed by Pro Armor® engineers puts other tires to shame. When you mount a set of Pro Armor® tires, be assured they're ready for rugged terrain.

3,000 MILE RATED

Pile on the miles with Pro Armor® tires. Every tire is designed and constructed with longevity in mind. With ratings of 3,000 miles and beyond, you are assured long life and performance.

PRO ARMOR® DUAL-THREAT

Engineered with dual-compound technology and radial construction to offer revolutionary off-road performance in all terrains. The lateral-grip compound on the outer edges of the tire has a softer durometer rubber for cornering performance and superior grip. The long-wearing compound in the middle of the tire has harder durometer rubber for increased traction during acceleration, straight line stability, and overall longer tread life.

ALL-TERRAIN TRACTION

It's tough to make Sportsman® and Polaris ACE® even more versatile than they already are. But with a set of Prospector Pro® Tracks, you'll do just that. Tread through deep snow without concern.

Polaris®-specific gearing provides 1:1 ratio to:

- Minimize track slip, providing better climbing ability and improved traction in deep snow
- Improve top speed over prior models by approximately 5%
- Reduce operating RPM for a quieter ride
- Improve driveline durability, which allows vehicle to run at a lower RPM, decreasing engine wear

Polaris® Exclusive optimized hub geometry that minimizes feedback and eases steering effort

Lightweight design provides for better flotation, eases steering effort, and provides better vehicle control

New front dual stabilizer for improved stability

Flexible lug design provides the highest level of deep snow performance by lifting up in deep snow as opposed to digging down

INTRODUCING

RIGID®

ADVANCED TECH

Rigid® lights are driven by Aluminum PCB Smart Boards™ with copper thermal conductive pads, gold-plated electrical contacts, 6063-T5 aircraft aluminum extruded housings treated with Alodine® corrosion preventive, and Tiger Drylac® UV protection polyester powder coating.

EXCLUSIVE OPTICS

RIGID® hand-selects the brightest high-tech LEDs from the best manufacturers. The LEDs shine through patented optics that maximize total light output and efficiency. RIGID® lights feature impact-resistant polycarbonate lenses for a 100% water/dustproof seal.

PRO ARMOR®

RUGGED STYLING DURABLE CONSTRUCTION

Pro Armor® lights are designed to be big and beefy with an aggressive style all their own. Housed in IP67 marine-grade rated UV Polyester powder-coated with precision-cast end panels and oversized, extruded aluminum heat sinks to keep the temperature down.

MASSIVELY BRIGHT

Counting up to 66 3-5 watt Cree® LEDs pushing over 11,000 lumens, Pro Armor® lights are some of the brightest in the industry. All that power is directed through heat-dissipating aluminum printed circuit boards for streamlined heat management.

RIGID® LIMITED LIFETIME WARRANTY* BREAK YOUR LIGHT AND RIGID® WILL REPLACE OR REPAIR IT FOR LIFE

ENGINEERED TO MAXIMIZE THE LIFE OF YOUR RIDE

All Polaris® fluids—from AGL to Demand Drive Fluid—are developed for your vehicle. Trust the only fluids perfectly engineered for your needs.

SPECIFIC NEEDS, SPECIFIC OILS

Polaris® invests millions in engine development, and part of that investment is making sure its lubricants—critical to engine performance—are the right formula for your specific engine. The amount of testing data and engineering resources used in developing Polaris® lubricants would overwhelm an aftermarket company. Therefore, the aftermarket must produce an oil to an industry-wide standard that must account for a variety of operating parameters.

PS-4 is designed specifically for Polaris® 4-cycle engines and has high film strength and wear protection under extreme loads and temperatures. Exclusive anti-wear additives protect engine parts with extra rust and corrosion protection.

Everything needed to change your oil! The correct filter & amount of oil for your vehicle.

PROVEN PROTECTION

Powersports grade, full-synthetic base oils and proprietary additive systems outperform leading automotive and aftermarket engine oils in 75 hour severe duty engine testing.

PS-4 vs. AUTO OIL

60% MORE ROD END BEARING WEAR PROTECTION WITH PS-4

WORN & GROOVED

+ 40% LESS CYLINDER WEAR WITH PS-4

+ 30% LESS GRAFAL WEAR* WITH PS-4

*The purpose of the grafal coating is primarily to decrease friction and protect the piston from wear.

PS-4 RACE PROVEN PERFORMANCE

"The Baja 1000 is probably the toughest race in the world! In the brutal Baja desert there are so many things that can ruin your race it is great to know that Polaris Engineered Lubricants will never let us down.

We trust in the Polaris products like the PS-4 motor oil to protect our machines vitals, they are a critical part of a winning formula."

TIRE SEALANT

HOW IT WORKS

Tire sealant remains liquefied inside your tire until a leak develops in the tire or wheel.

Once a leak occurs, the tire sealant rushes out of the tire and quickly creates a permanent solid plug.

The plug maintains the pressure of the tire so you can continue your ride.

PREMIUM TIRE SEALANT

- Instantly seals and repairs rim, bead leaks, and punctures up to 1/4" on standard tires, and 3/4" on heavy ply tires
- Helps maintain air pressure for the life of the tire
- Helps seal the tire bead against the wheel
- 100% water soluble for easy cleanup

- Will not rust, corrode, or pit wheels
- Creates permanent repair
- Remains fluid and effective in temperatures down to -45° F
- Easily installed through existing tire valve stem with valve core removed

HOW TO INSTALL

Remove wheel and axle nut

Remove brake caliper, hub, tie rod, & upper & lower ball joints

Remove old boot & clean joint

Spread silicone lube on entire cone tool. Slide boot over cone tool, large end first. See package for outer boot instructions.

Empty the bag of grease into the CV joint/boot, clean sealing points & install clamps

Reassemble tie rod, ball joints, brake caliper, axle nut, tire & wheel

Refer to your owner's manual for further instructions and torque specifications.

*Designed for temporary CV boot repair. Purchase the OEM CV Boot for a permanent repair.

FOR THE LIFE OF YOUR RIDE

THE KEY TO KEEPING YOUR POLARIS® OFF-ROAD VEHICLE PERFORMING as well as the day you brought it home is proper maintenance. Items like belts, filters, and batteries represent only a few of these critical items engineered specifically by Polaris®.

AIR FILTERS

Critical to engine performance and reliability. A clogged air filter can restrict air flow to the engine leading to reduced engine performance. Dirt and debris ingestion can damage the engine leading to reduced engine life or catastrophic failure. Polaris® recommends changing the vehicle's air filter at the specified intervals outlined in the owner's manual, which may be shorter if your vehicle is subject to severe conditions.

BRAKE PADS

Check your brakes if you are close to the recommended service interval, hear grinding when applying the brakes, your vehicle is taking longer to stop or if you have to apply more pressure to your pedal to engage the brakes. Check the brake discs for signs of cracks, excessive corrosion or warping.

If the brake pads are contaminated with oils or grease (petroleum products), brake pads have to be discarded and replaced.

Discs need to be cleaned with brake cleaner or alcohol based cleaner only.

DRIVE BELTS

Polaris Engineered™ belts deliver unmatched performance for your off-road vehicle. Developed and tested on all our engines for all environments and conditions. Check your belt for delamination, hour glassing and glazing.

OIL FILTERS

Change oil filters with every oil change to provide the best protection for your engine. Superior engine protection keeps your engine operating at peak performance. Be sure to follow the suggested service intervals for oil/oil filter changes.

BATTERIES

Never leave a battery unattended during the storage season. To ensure your battery maintains its level of charge when unused for extended periods of time or during freezing weather, the battery should be connected to a BatteryMINDER®. Be sure to check for corrosion from the terminals to the ends of the cables.

MAINTENANCE TIP

BREAK-IN PERIOD

The break-in period for your new Polaris Sportsman® is the first 25 hours of operation, or the time it takes to use the first two tanks of fuel. No single action on your part is as important as a proper break-in period. Careful treatment of a new engine will result in more efficient performance and longer life for the engine. Perform the listed procedures carefully.

NOTICE: Excessive heat build-up during the first three hours of operation will damage close-fitted engine parts. Do not operate at full throttle or high speeds for extended periods during the first three hours of use.

BATTERY MAINTENANCE TIPS

Extend your battery life with a BatteryMINDER® and these tips.

1. Store batteries in a cool, dry location.
2. Check that the battery connections are tight. Cables should not be able to be rotated or shifted by hand.
3. If your battery has a drain tube, make sure it is free of clogs.
4. Clean your battery - use a soft brush to scrub the top of the battery. Use baking soda to remove grease.
5. Connect a BatteryMINDER® after using your vehicle even if the vehicle is in regular use.
