ENGINEERED

FOR MORE

Ensuring Polaris Engineered™ Accessories fit and work in sync with your machine is the most critical phase of testing and validation. With seamless integration, you can trust that any Polaris® accessory you install will enhance your interaction beyond your expectations.

LOCK & RIDE

CARGO VERSATILITY

Lock & Ride® mounting locations allow for limitless customization to let you work the way you want.

P. 17, 24

PRO PRO HEAVY DUTY SERIES WINCHES

INTEGRATED WINCH MOUNT & PRE-WIRED

Designated mounting points and pre-wired contactors ensure a perfect fit and the strongest place to attach the Polaris Engineered™ winch - the most dependable winch for your Sportsman®. With wiring built right into the vehicle, we made this the easiest Sportsman® winch ever made to install.

P. 10

GLACIER PLOW SYSTEM

INTEGRATED PLOW MOUNT

The attachment points for the best-in-class Glacier® Plow System are integrated right at the factory and feature an innovative drive-up and go installation process.

P. 38

SUPERIOR INTEGRATION

Right from the factory, your vehicle is built to make essential accessories like winches and plows easy to use day-in and day-out. Mounting brackets are designed into the oversized factory bumper and wiring is routed securely and properly. When it comes to Sportsman®, Polaris Engineered™ Accessories make work easier so you can get more done.

EASY TO CHANGE WINDSHIELDS WITH 6-DART INSTALL

Our fairing system allows for changing out the windshield quickly and easily. Simply remove the six dart-type fasteners and swap out the windshield.

LOCK & RIDE SPORTSMAN® WINDSHIELDS

- Windshield installs on the ATV in seconds without tools with its Lock & Ride® technology. It can also be removed in seconds without tools
- Lock & Ride® mounts allow a rider to adjust the height and angle of the windshield
- Poly windshields are flexible, impact-resistant, and provide long-term value over the life of your machine
- Three heights available for whatever coverage you prefer
- Does not work with handguards

PRO ARMOR

Each wheel and tire Pro Armor® designs for off-road vehicles performs perfectly in the intended environment for its intended use. Developed, tested, and produced in partnership so you can tackle the terrain ahead with Polaris®.

TRIPLE-BELTED SIDEWALLS

- Sidewalls are the most vulnerable puncture area of any off-road tire
- Pro Armor® makes tires with extra protection exactly where it's needed most – the sidewall

8 OR 10-PLY RATED

- Pro Armor® builds the toughest tires
- Higher ply ratings mean added protection

INNOVATION

DUAL DUROMETER LUGS (Crawler XG & Attack 2.0)

- Firm durometer rubber on base of lug for stability
- Soft durometer rubber on top of lug for sticky grip

DUAL COMPOUND TREAD (Dual-Threat)

- Firm durometer rubber on center of tread for long wear life
- Soft durometer rubber on shoulders of tread for superior grip

3,000+ MILE RATED

Pile on the miles with Pro Armor® tires. Every tire is designed and constructed with longevity in mind. With ratings of 3,000 miles and beyond, you are assured long life and performance.

KNOW YOUR TIRES

DIMENSIONS	TREAD DEPTH	WEIGHT	PLY RATING	SIDEWALL BELTS	LOAD RATING
28" x 9" R14	A deeper tread means more grip in all conditions	A lighter tire makes for improved vehicle performance	Indicates tire puncture-resistance	Increase your resistance to sidewall punctures	Tires with higher load ratings can handle more weight
TIRE HEIGHT TIRE WIDTH WHEEL DIAMETER					

KNOW YOUR TERRAIN

- Extra deep treads
 - Self-cleaning lugs
- Tread patterns optimized for extreme traction
 - Ideal for both hard pack and loose trail
- Industry leading anti-puncture side walls
 - Purpose-built, long lasting tread patterns
- Handles extreme cold
 - Holds shape and provides traction
- Paddles provide traction and durability in soft sand
 - Built to float on top of sand
- Flexible "grippy" tread
 - Aggressive side bite
- Provides traction and durability
 - Built to perform in hard sand, jagged rocks or any other extreme terrain

TRAIL

- Tread patterns optimized for extreme traction
- Ideal for both hard pack and loose trail

PRO ARMOR® DUAL-THREAT

- Dual-compound technology and radial construction offer performance in all terrains
- Softer durometer rubber on outer edge for overall superior grip and feel
- Harder durometer rubber in the middle for increase traction during acceleration and longer tread life

ALL-TERRAIN TRACTION

It's tough to make Sportsman® even more versatile than it already is. But with a set of Prospector Pro® Tracks, you'll do just that. Tread through deep snow without concern.

Polaris®-specific gearing provides 1:1 ratio to:

- Minimize track slip, providing better climbing ability and improved traction in deep snow
- Improve top speed over prior models by approximately 5%
- Reduce operating RPM for a quieter ride
- Improve driveline durability, which allows vehicle to run at a lower RPM, decreasing engine wear

Polaris' exclusive optimized hub geometry that minimizes feedback and eases steering effort

Lightweight design provides for better flotation, eases steering effort, and provides better vehicle control

Flexible lug design provides the highest level of deep snow performance by lifting up in deep snow as opposed to digging down

FOR THE LIFE OF YOUR RIDE ONLY THE BEST WILL DO

To create the best oil for any terrain, we invest in rigorous testing to ensure our oil delivers the consistency and performance you demand. The results are Polaris Engineered Lubricants™ that are tested and perfected to deliver excellent total engine protection for the life of your ride.

WHAT COUNTS IN OIL TESTING:

1. Does it protect the engine at high temperatures?
2. Does it keep the engine free from carbon and buildup?
3. Does the oil hold its viscosity over time?

ENGINE CHECKPOINTS

When evaluating an engine oil and its ability to protect and preserve the engine's power output and lifespan, Polaris® engineers focus on key areas within the engine, some of the most critical ones include:

RING LANDS: Poor oxidative performance can lead to carbon and varnish buildup, which results in poor ring seal and loss of power, combustion blow by and fuel dilution of the oil.

PISTON RINGS: During the combustion process, extreme pressures are placed on the top ring, forcing it outward toward the cylinder wall, sealing the combustion chamber. With so much force applied, poor oil film strength between the top ring and the cylinder wall can lead to cylinder wear and loss of power.

ROD BEARINGS: Engine bearings ride on an extremely thin hydrodynamic film of oil. Poor oil film strength or using an oil with a thinner viscosity, can lead to premature bearing wear or even engine failure. Using an oil with high film strength and a strong viscosity, like PS-4 full synthetic, will extend the service life of your engine.

CAMSHAFT: Direct Acting Overhead Camshafts are used on many Polaris® Prostar® Engines. In this application the camshaft pushes directly on the valve, creating very high contact pressures compared to other camshaft configurations. These forces are so great that inferior oil can break down and be forced out of the contact area leading to increased wear. PS-4 full synthetic additives are specifically designed to provide wear protection against this.

SPECIFIC NEEDS, SPECIFIC OILS

Polaris® invests millions in engine development, and part of that investment is making sure its lubricants—critical to engine performance—are the right formula for your specific engine. The amount of testing data and engineering resources used in developing Polaris® lubricants would overwhelm an aftermarket company. Therefore, the aftermarket must produce an oil to an industry-wide standard that must account for a variety of operating parameters.

PS-4 is designed specifically for Polaris® 4-cycle engines and has high film strength and wear protection under extreme loads and temperatures. Exclusive anti-wear additives protect engine parts with extra rust and corrosion protection.

PS-4 FULL-SYNTHETIC OIL

PS-4 is optimal for ambient operating temperatures of -40° F to 100° F

OUR FORMULATION

- Full-synthetic formula with wide, 5W-50 viscosity range
- Extreme cold weather flow and startup protection
- Maximum rust and corrosion protection
- Proprietary anti-wear additive system

YOUR ADVANTAGE

- All-weather engine protection
- Easy starting in all conditions
- Internal engine protection from extreme temperature fluctuations and periods of non-use or storage
- Reduced friction, protects cams, pistons, bearing and valvetrain components from wear

PS-4 EXTREME-DUTY FULL-SYNTHETIC OIL

PS-4 Extreme Duty is optimal for ambient operating temperatures of 0° F to 130° F

OUR FORMULATION

- Extreme high-temperature engine protection
- Full-synthetic formula with strong, 10W-50 Viscosity Range
- Protects against rust and corrosion of internal engine parts during periods of non-use or storage

YOUR ADVANTAGE

- High-strength film protection withstands extreme heat, stress and sustained high RPM conditions
- Extremely shear stable, maintains viscosity under heat and stress
- Protects engine from moisture that can build up inside the engine as a result of extreme temperature fluctuations

OIL CHANGE KITS (OIL & FILTER)

These convenient kits include everything you need to change your oil. The correct filter and oil volume for your vehicle.

TIRE SEALANT

HOW IT WORKS

Tire sealant remains liquefied inside your tire until a leak develops in the tire or wheel.

Once a leak occurs, the tire sealant rushes out of the tire and quickly creates a permanent solid plug.

The plug maintains the pressure of the tire so you can continue your ride.

PREMIUM TIRE SEALANT

• Instantly seals and repairs rim, bead leaks, and punctures up to 1/4" on standard tires, and 3/4" on heavy ply tires
• Helps maintain air pressure for the life of the tire
• Helps seal the tire bead against the wheel
• 100% water soluble for easy cleanup

• Will not rust, corrode, or pit wheels
• Creates permanent repair
• Remains fluid and effective in temperatures down to -45° F
• Easily installed through existing tire valve stem with valve core removed

FOR THE LIFE OF YOUR RIDE

MAINTENANCE TIP

BREAK-IN PERIOD

The break-in period for your new Sportsman® is the first 25 hours of operation, or the time it takes to use the first two tanks of fuel. No single action on your part is as important as a proper break-in period. Careful treatment of a new engine will result in more efficient performance and longer life for the engine. Perform the listed procedures carefully.

NOTICE: Excessive heat build-up during the first three hours of operation will damage close-fitted engine parts. Do not operate at full throttle or high speeds for extended periods during the first three hours of use.

SEE OUR LATEST MAINTENANCE TIPS AT [POLARIS.COM/MAINTENANCE-VIDEOS](https://www.polaris.com/maintenance-videos)

BATTERIES

Never leave a battery unattended during the storage season. To ensure your battery maintains its level of charge when unused for extended periods of time or during freezing weather, the battery should be connected to a BatteryMINDER®, P. 56. Be sure to check for corrosion from the terminals to the ends of the cables.

BRAKE PADS

Check your brakes if you are close to the recommended service interval, hear grinding when applying the brakes, your vehicle is taking longer to stop or if you have to apply more pressure to your pedal to engage the brakes. Check the brake discs for signs of cracks, excessive corrosion or warping.

If the brake pads are contaminated with oils or grease (petroleum products), brake pads have to be discarded and replaced.

Discs need to be cleaned with brake cleaner or alcohol based cleaner only.

HALF SHAFT

Extreme elements can contribute to axle failure when grease escapes the joint. This usually occurs if the CV boot becomes compromised. Full replacement or part specific available.

POLARIS® ENGINEERS PARTS THAT PUSH THE LIMITS WITHOUT SACRIFICING STRENGTH AND DURABILITY. We build our products so anyone with the right tools can maintain their vehicle from their own garage - and get them back on the trails where they belong.

AIR FILTERS

Critical to engine performance and reliability. A clogged air filter can restrict air flow to the engine leading to reduced engine performance. Dirt and debris ingestion can damage the engine leading to reduced engine life or catastrophic failure. Polaris® recommends changing the vehicle's air filter at the specified intervals outlined in the owner's manual, which may be shorter if your vehicle is subject to severe conditions.

DRIVE BELTS

Polaris Engineered® belts deliver unmatched performance for your off-road vehicle. Developed and tested on all our engines for all environments and conditions. Check your belt for delamination, hour glassing and glazing.

BREAK-IN PERIOD

- Use lower gear (if available) while varying speeds and avoiding wide open throttle for 5-10 miles
- If no low gear is available, vary at moderate speeds while avoiding wide open throttle for 50 miles

OUR INVESTMENT

- 20,000 miles of field testing
- Thousands of dyno hours
- 18+ months of development (3,000+ design hours) per belt
- 1200+ vehicle validation hours
- Collaboration with powertrain & clutch engineers

YOUR ADVANTAGE

- No clutch recalibration
- Less wear & tear due to heat
- Ensure maximum vehicle performance
- More time riding, less time wrenching
- Produced in collaboration with powertrain and clutch engineers to ensure a perfect fit, maximum performance and ultimate durability

OIL FILTERS

Change oil filters with every oil change to provide the best protection for your engine. Superior engine protection keeps your engine operating at peak performance. Be sure to follow the suggested service intervals for oil/oil filter changes.

HD HEAVY DUTY PARTS

All Polaris® parts are developed and tested to help you get the most out of your ride. Now, we're taking the passion of our riders, workers, and outdoor enthusiasts to the next level with HD Parts. These heavy-duty parts are engineered for riders who want greater durability and enhanced performance. HD Parts are designed and tested to handle greater wear and tear under all weather conditions. This means longer ride times with less service interruptions and related costs.

DUST

MUD

EXTREME COLD
DOWN TO -40° F

EXTREME HEAT
UP TO 130° F

HEAVY PAYLOADS

EXTENDED LIFE

SUSPENSION BOOTS*

- Thicker, stronger boot material better withstands cuts and tears
- Prevents the intrusion of water and contaminants, increasing joint life
- More resistant to cracking due to aging

BRAKE PADS*

- Longer wear life
- Improved braking in wet & muddy conditions

WHEEL BEARINGS*

- Utilizes a triple lip seal for improved protection against mud and debris
- Longer life between service and replacement
- Specifically designed for Polaris® vehicles

TIRES*

- Increased tread life
- Material and design for enhanced puncture resistance

LUBRICANTS*

- High-temperature engine protection
- Increased rust and corrosion protection
- Reduced chance of thermal breakdown in high-temp environments

BATTERIES*

- Improved starting in cold/poor conditions means increased performance of accessories and longer vehicle operation.
- **Larger Capacity**
Measured in Ah (Ampere Hours)
HD batteries store more energy
 - **Higher Output**
Measured in CCA (Cold Cranking Amps)
HD batteries deliver more power when starting and power more auxiliary items

*Claims made based off testing and performance of Polaris® HD Parts against standard OEM parts made by Polaris® and competitor brands under normal use.

For more information regarding Polaris® HD parts including vehicle compatibility, installation, and maintenance, please contact your authorized Polaris® ORV dealer (Ranger®, ATV, RZR®).

BATTERY MAINTENANCE TIPS

Extend your battery life with a BatteryMINDER® and these tips.

1. Store batteries in a cool, dry location.
2. Check that the battery connections are tight. Cables should not be able to be rotated or shifted by hand.
3. If your battery has a drain tube, make sure it is free of clogs.
4. Clean your battery - use a soft brush to scrub the top of the battery. Use baking soda to remove grease.
5. Connect a BatteryMINDER® after using your vehicle even if the vehicle is in regular use.

LIFT IT SECURELY LIFT IT SAFELY

POLARIS® VEHICLE LIFT

- Get fast, easy access to the underside of your vehicle
- Manual and pneumatic operation available
- Raises vehicle up to 32" to make repairs and maintenance faster and easier

CV BOOT REPAIR KIT

- A quick trail side fix to increase trail time
- The flexible and durable boot material expands over a cone tool for CV boot repairs, without disassembling CV axles
- Universal fit – works as a temporary fix for most powersports axles
- All components fit inside the cone, and a cover is provided for compact durable storage
- Easily fits in a cargo box, attached to the roll cage, in the glovebox, or many other storage locations

Items shown are contained inside cone

ATV CV BOOT REPAIR KIT

Kit includes the following items:

- (1) Expandable CV Boot
- (1) Reusable Cone Tool
- (2) CV Boot Clamps
- (1) Tube of Silicone Lube
- (1) Grease Packet
- (1) Cone Cover

» 2830528 • \$25⁹⁹

ATV TRAIL BOOT ONLY

» 2830529 • \$14⁹⁹

UTV

» CV REPAIR KIT 2830526 • \$29⁹⁹

» TRAIL BOOT ONLY 2830527 • \$14⁹⁹

SEE HOW THE CV BOOT REPAIR KIT WORKS AT [POLARIS.COM/MAINTENANCE-VIDEOS](https://www.polaris.com/maintenance-videos)

HOW TO INSTALL

Remove wheel and axle nut.

Remove brake caliper, hub, tie rod, & upper & lower ball joints.

Remove old boot & clean joint.

Spread silicone lube on entire cone tool. Slide boot over cone tool, large end first. See package for outer boot instructions.

Empty the bag of grease into the CV joint/boot, clean sealing points & install clamps.

Reassemble tie rod, ball joints, brake caliper, axle nut, tire & wheel.

Refer to your owner's manual for further instructions and torque specifications.
*Designed for temporary CV boot repair. Purchase the OEM CV Boot for a permanent repair.

CLEAN YOUR VEHICLE

PRE-TREAT

MUD SHIELD® PRE-TREATMENT

- Inhibits the adhesion of dirt, mud, and snow, making cleaning your vehicle faster and easier.

» 16 OZ. AEROSOL • 2830208 • \$9⁹⁹

NEW

WORK JACKET

\$159⁹⁹

This warm and rugged jacket was engineered to be tough enough for work and stylish enough for play. The outer fabric is crafted with Nylon 6, a durable, non-stretch woven fabric that is rugged and tear resistant but feels like a soft, comfortable material. Protection and warmth with 100% nylon shell coated with durable water repellency (DWR).

External features:

- Superior Durable Water Repellent (DWR) treatment provides water-resistance in the elements
- Four external pockets for maximum gear storage
- Customized fit with Velcro® wrist closure cuffs

Internal features:

- 80 gram 3M® Thinsulate for warmth on chilly days
- Built in action back provides comfortable movement and increased range of motion
- Internal zipper pocket
- Brushed flannel trim
