# WINDSHIELDS

Keep the elements out and control air flow

- Superior optical clarity (automotive level)
- Scratch resistant
- · Curved to fit, seals tight
- Cold weather / heavy duty • Wiper ready (windshield only)
- · Lightweight, flexible, easy to store/remove
- Impact-resistant · Tight seal keeps out rain and dust
- Hard Coat: 30x more scratch resistance than regular poly windshields

Offers fully-sealed or flipped-down venting options. Upper half detaches, leaving lower half for protection with maximum ventilation.

# REAR **PANELS**

Turbulent air forms above the cargo bed and behind the cab when you add a windshield. This swirl can carry dirt, dust, leaves, and rain into the cab. Eliminate this phenomenon and control the swirl by installing a rear panel.

ENHANCEMENTS & UPDATES AT POLARIS.COM/RIDECOMMAND

**MOUNTS PERFECTLY** 

Designed for your Polaris Engineered bumper, roof or other mounting point MAX PERFORMANCE Validated to work as hard as your machine does

**DOESN'T OVERTAX** Trust it to work when you need it to

#### **ADVANCED** TECH

RIGID® lights are driven by Aluminum PCB Smart Boards®, 6063-T5 aircraft aluminum extruded housings and Tiger Drylac® UV protection polyester powdercoating.

#### **EXCLUSIVE** OPTICS

RIGID® invests heavily in optical science and has patented multiple optics and optics systems, maximizing light output and efficiency.

#### RIGID<sup>®</sup> LIMITED **LIFETIME WARRANTY**

If you own a RIGID® light and it breaks, we will replace or repair it for life.\*

#### RUGGED CONSTRUCTION

Pro Armor lights are designed to be big and beefy with an aggressive style all their own, and housed in IP67 marine-grade rated UV polyester powdercoating.

#### MASSIVELY BRIGHT

Pro Armor builds bright lights designed for any riding experience. All that power is directed through heat dissipating aluminum for streamlined heat management.

#### LIGHT BAR TYPES

**SR-SERIES PRO** 

Sleek, powerful, low-profile (under 2" tall). Lights extreme distances with low energy usage. Available in 10" & 32"

#### D-SERIES PRO

Compact to fit almost anywhere with high output and low energy usage. Available in Driving, Flood & Spot

SEE THE RIGID® LIGHTING BUYERS GUIDE AT VOITTURE COM/POLARISORY SEARCH "RIGID""

#### **DUAL-ROW LED LIGHT BARS**

The most spread and farthest illumination downrange. Easy to mount.

Available in Cube, 10", 20" & 30"

#### **SINGLE-ROW LED LIGHT BARS**

Powerful, compact, low-profile light bars with sleek look.

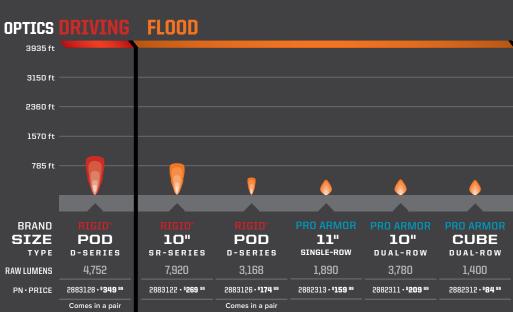

Available in 11", 33" & 40"

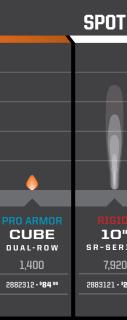

#### **CUBE LED LIGHTS**

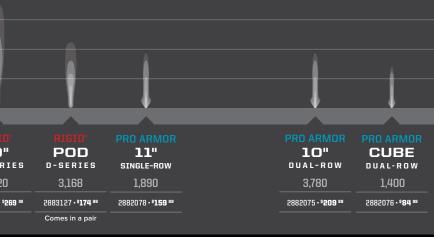

Small size allows mounting in strategic locations for added lighting. Available in Flood & Spot

### LIGHT BAR OPTIONS

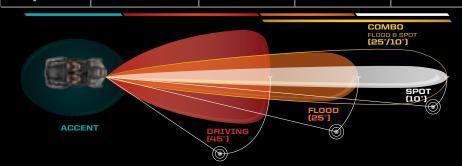

## **BUILD YOUR** VISION

Consider the Optics, Angle & how you will use your vehicle to choose the right light or set of lights.

OPTICS Light angle	ACCENT	DRIVING (45°)	FLOOD (25°)	SPOT (10°)	COMBO (25°/10°)
DRIVING SPEED	All	Slow	Medium	Fast	Medium to fast
BEAM	Diffused glow	Extra-wide	Wide/Shorter	Concentrated/Long	Inner spot & outer flood
RECOMMENDED Mounting	Low/Wheel well	All points	Low 6/or rear	High points	All points
TERRAIN & RIDING STYLE	Added style & personalization in any terrain	All riding & utility	Wide-open terrain or trails & utility	Trail & tight conditions	All riding & utility

# **POLARIS ENGINEERS PARTS THAT PUSH THE LIMITS** WITHOUT SACRIFICING STRENGTH AND DURABILITY. We build our products so anyone with the right tools can maintain

their vehicle from their own garage - and get them back on the trails where they belong.

# **MAINTENANCE** TTP

#### **BREAK-IN PERIOD**

The break-in period for your new GENERAL is the first 25 hours of operation, or the time it takes to use the first two tanks of fuel. No single action on your part is as important as a proper break-in period. Careful treatment of a new engine will result in more efficient performance and longer life for the engine.

NOTICE: Excessive heat build-up during the first three hours of operation will damage close-fitted engine parts. Do not operate at full throttle or high speeds for extended periods during the first three hours of use.

SEE OUR LATEST MAINTENANCE TIPS AT GENERAL.POLARIS.COM/EN-US/SELF-HELP

#### **AIR FILTERS**

FOR THE LIFE OF YOUR RIDE

A clogged air filter can restrict air flow to the engine leading to reduced engine performance. engine life or catastrophic failure.

#### **BRAKE PADS**

Maintaining and/or replacing brakes are critical to the safety and functionally of a vehicle. Brake pads should be checked for wear and oil or grease (petroleum products) contamination and brake discs should be checked for cracks, excessive corrosion or warning.

#### HALF SHAFT

Check for tear and nunctures in the hoot which can lead to CV joint wear that can contribute to axle failure.

# **DRIVE BELTS**

Polaris Engineered belts deliver unmatched performance for your off-road vehicle. Developed and tested on all our engines for all environments and conditions. Check your belt for delamination, hour glassing and glazing.

#### BREAK-IN PERIOD

- · Use lower gear (if available) while varying speeds and avoiding wide open throttle for 5-10 miles
- · If no low gear is available, vary at moderate speeds while avoiding wide open throttle for 50 miles

#### **OUR INVESTMENT**

- · 20,000 miles of field testing
- · Thousands of dyno hours
- 18+ months of development (3,000+ design hours) per belt
- 1200+ vehicle validation hours
- · Collaboration with powertrain & clutch engineers

#### VOUR ADVANTAGE

- · No clutch recalibration
- Less wear & tear due to heat
- · Ensure maximum vehicle performance
- · More time riding, less time wrenching
- Produced in collaboration with powertrain and clutch engineers to ensure a perfect fit, maximum performance and ultimate durability

#### **BATTERIES**

To ensure a battery maintains its level of charge when unused for extended periods of time or during freezing weather, the battery should be connected to a BatteryMINDer\*, P. 46. Be sure to check for corrosion from the terminals to the ends of the cables

#### OIL FILTERS

Change oil filters with every oil change to provide the best engine protection and keep the engine operating at peak performance.

## FOR THE LIFE OF YOUR RIDE **ONLY THE BEST WILL DO**

To create the best oil for any terrain, we invest in rigorous testing to ensure our oil delivers the consistency and performance you demand.

#### WHAT COUNTS IN OIL TESTING:

- 1. Does it protect the engine at high temperatures?
- 2. Does it keep the engine free from carbon and buildup?
- 3. Does the oil hold its viscosity over time?

#### **ENGINE CHECKPOINTS**

Polaris engineers focus on key areas within the engine when evaluating engine oil and its ability to protect the life of your ride. Critical checkpoints include:

PISTON RINGS & RING LANDS: Extreme pressure to these parts require high lubricant film strength. Poor oxidative performance can lead to carbon and varnish buildup, which results in poor ring seal and fuel dilution of the oil. These can result in loss of power and accelerated engine wear.

**ROD BEARINGS:** Engine bearings on an oil with low film strength and thinner viscosity can lead to premature wear or even engine failure.

CAMSHAFT: Direct acting overhead camshafts are used on many Polaris engines. In this application the camshaft pushes directly on the valve, creating very high contact pressures compared to other camshaft configurations. These forces are so great that inferior oil can break down leading to increased wear and potential engine damage.

# TIRE SEALANT

# **HOW IT WORKS**

Tire sealant remains liquefied inside your tire until a leak develops in the tire or wheel.

**HOW MUCH TIRE SEALANT** 

DO YOU NEED?

FOR A FULL APPLICATION CHART, VISIT

POLARIS.COM/TIRESEALANTCHART

**OUNCES** 

REOUIRED

**PER TIRE** 

TIRE

WIDTH

(IN.)

Once a leak occurs, the tire sealant rushes out of the tire and quickly creates a permanent solid plug.

The plug maintains the pressure of the tire so you can continue your ride.

- Instantly seals and repairs rim, bead leaks, and punctures up to 1/4" on standard tires, and 3/4" on heavy ply tires
- · Helps maintain air pressure for the life of the tire
- · Helps seal the tire bead against the wheel

**PREMIUM TIRE SEALANT** 

- · 100% water soluble for easy cleanup · Will not rust, corrode, or pit wheels
- · Remains fluid and effective in temperatures down to -45° F
- · Easily installed through existing tire valve stem with valve core removed
