A Polaris Engineered winch is designed to help you get the job done right, get you on your way faster and prepare you for the unexpected.

WHY POLARIS?

Polaris off road vehicles are engineered with designated mounting points and wiring for seamless install of Polaris Engineered winches.

TESTED 1,200+ PULLS AT MAX LOAD

OPERATES FULLY SUBMERGED

MILITARY TESTED & APPROVED

FEATURES & BENEFITS

ALL POLARIS ENGINEERED WINCHES COME WITH:

- ✓ INTEGRATED WIRING, MOUNT, PREASSEMBLED
- ✓ HOOK WITH STRAP
- CUT STEEL GEARS & SEALED DRIVETRAIN
- **✓** SEALED PERMANENT MAGNET MOTOR

Retrieve cable 5x as fast as standard mode on other Polaris winches. Get back to riding or complete your task quicker.

- Set winch dial to N (Neutral) to manually pull the rope out and secure the hook to your anchor point 2. Set winch dial to L (Low) for maximum pulling power
- while winching your load

 3. Set winch dial to H (High) for retrieving the rope 5x faster with Rapid Rope Recovery

Auto Stop technology protects and extends the life of your winch by automatically stopping the winch at the end of pull to prevent over-spooling. While plowing, it prevents the plow frame from bending by stopping the winch once the plow has been lifted.

With its lightweight, yet extremely strong, design and superior flexibility, this 50 FT long synthetic rope is easy to handle and can stand up to any tough job.

This convenient remote operates your Polaris winch wirelessly from within 50 FT of the vehicle. Operate your winch safely outside your vehicle while on the job site or trails.

ENGINE WEAR TEST

LOWER NUMBER = LESS ENGINE COMPONENT WEAR LESS WEAR ON PARTS MEANS LONGER ENGINE LIFE

ASTM D4172. In 3rd party testing against 9 competitive products Polaris had 40% or better wear protection compared to all of The tested products. Numbers represent mon wear scarring measured. These measures wear protection compared to all of the tested products. Numbers represent mon wear scarring measured. Test measures wear at contact points wear scar is measured for its length and width (in units of mm). Lower wear numbers mean better wear protection and friction reduction.

DEPOSIT TEST

LOWER DEPOSITS = MAXIMUM POWER

ASTM D6335. In 3rd party testing against 9 competitive products Polaris PS-4 had less than half the deposits compared to sest product. No other tested products met Polaris Engineering standards for deposit cleanliness. Test measure mass of deposits in mg in high temp, high stress test cycles. Higher deposits will impact engine power and performance.

THE AMERICAN POWERSPORTS CO.

At Polaris, we believe being an American company isn't a sales pitch; it's a way of doing business. It's the place we call home. The place our riders call home.

It all began here in America—over 70 years ago—in a small factory in Roseau, Minnesota. There, our founders forged a company built on American values, grit and ingenuity. That factory is not so small anymore and still operates to this day—creating jobs and producing the best our industry has to offer. The best America has to offer.

Today, we continue to design, engineer and test our industry-leading vehicles with owners like you—right here on American dirt, sand, snow and soil.
