

ENGINE

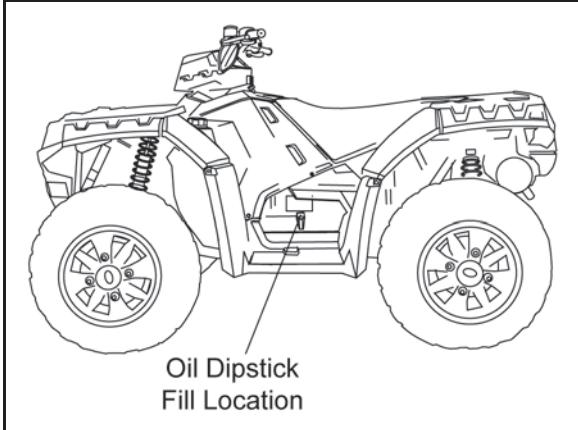

Engine Oil Level

Polaris recommends the use of Polaris PS-4 Plus synthetic engine oil. Oil may need to be changed more frequently if Polaris engine oil is not used.

CAUTION

Mixing brands or using a non-recommended engine oil may cause serious engine damage. Always use the recommended engine oil. Never substitute or mix engine oil brands.

1. Locate engine oil dipstick on the left side of the ATV.

2. Position the ATV on a level surface.
3. Stop engine and remove the dipstick. Wipe it dry with a clean cloth.
4. Reinstall and tighten the dipstick.

NOTE: The dipstick must be screwed in completely to ensure an accurate measurement.

5. Remove the dipstick and check the oil level.

Maintain oil level in **SAFE** range

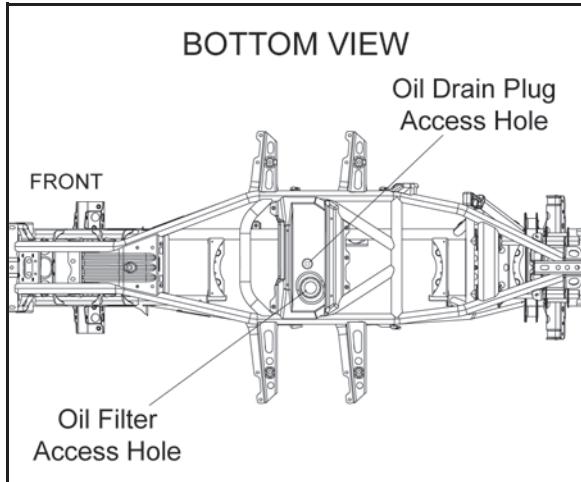

Screw in completely to check level

6. Maintain the oil level in the safe range. Do not overfill.

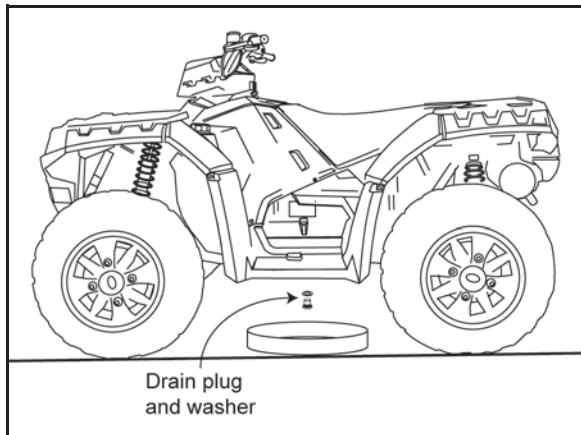

Engine Oil and Filter Change

Always change engine oil and filter at the intervals outlined in the Periodic Maintenance Chart. Always change the oil filter whenever changing the engine oil.

1. Position the ATV on a level surface.
2. Place the transmission in park.
3. Start engine and allow it to run for two to three minutes until the engine is warm.
4. Stop the engine.
5. Clean the area around the drain plug.

6. Place a drain pan beneath the engine crankcase.
7. Using a 6 mm Hex socket, remove the drain plug and allow the engine oil to drain completely.

WARNING

Hot oil can cause serious burns to skin.
Do not allow hot oil to contact skin.

8. Replace the sealing washer on the drain plug.

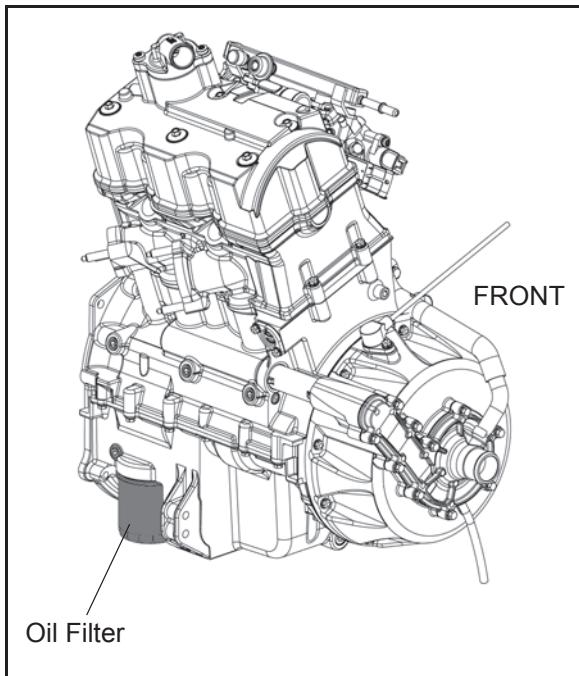

NOTE: The sealing surfaces on the drain plug and crankcase should be clean and free of burrs, nicks or scratches.

9. Reinstall drain plug and torque to **12 ft. lbs. (16 Nm)**.

**Engine Drain Plug:
12 ft. lbs. (16 Nm)**

10. Locate oil filter through access hole in the skid plate. Place shop towels beneath the oil filter. Using oil filter wrench (**PU-50105**) turn oil filter counterclockwise to remove it.

11. Use a clean dry towel to clean the filter sealing surface on the crankcase.
12. Check to make sure the O-ring on the new oil filter is in good condition. Lubricate O-ring on new filter with a film of fresh engine oil.
13. Install new oil filter and turn by hand until filter gasket contacts the sealing surface, then turn it an additional 1/2 turn.

Oil Filter Torque:

Turn by hand until filter gasket contacts sealing surface, then turn an additional 1/2 turn.

14. Remove dipstick and fill engine with 2 qts. (1.9 l) of the recommended engine oil.

Recommended Engine Oil:

PS-4 Plus Synthetic 4-Cycle Engine Oil
(PN 2876244) (Quart)

15. Start the engine and allow it to idle for one to two minutes.
16. Stop the engine and check for leaks.
17. Re-check the oil level on the dipstick and add oil as necessary to bring the level to the upper mark on the dipstick.
18. Dispose of used oil and filter properly.
