

BatteryMINDER® Plus with SmarTECHnology® Charger - Maintainer - Desulfator

The BatteryMINDER® Plus P/N 2830404 with SmarTECHnology® is a 4-Stage microprocessor controlled Plug 'n Run 12V 1.5A Charger - Maintainer - Desulfator. Includes full-time automatic high frequency pulse desulfation (not high voltage), which helps extend the life of a battery up to four times over its normal life. Unit can maintain up to four 12 Volt batteries at one time when connected in parallel by using BatteryMINDER SmarTECHnology® Y-Connectors (P/N 2830409).

The BatteryMINDER Plus employs the latest technology plus many added features. Plug 'n Run (no buttons to push) ensures easy trouble-free use while exclusive Ambient Temperature Sensor ensures proper charge rate regardless of temperature (0° - 130° F) and prevents over or undercharging regardless of how long connected.

Unit capable of restoring deeply discharged batteries as low as 3-Volts to full charge, while simultaneously desulfating them and will reject damaged-shortened batteries to prevent possible hazardous condition.

Unit can be permanently mounted to outlet using optional mounting tab-screw (included) preventing fall out or loose connection to power source.

Meets world-standard IP-65 for waterproof-intrusion (always use UL or ETL Listed weather-proof receptacle if used outdoors).

Full-Time automatic Pulse-type desulfation dissolves sulfate in older batteries extending their life and performance. Eliminates electrolyte water loss due to overcharge.

CEC, Energy Star and ETL Certified.

FEATURES

- Charges - Maintains - Desulfates
- Flooded (filler cap), Sealed,
- Maintenance-free, Starter, Deep
- Cycle, AGM, Marine*
- Guaranteed to never overcharge
- Extends battery life up to 4 times
- Capable of 4 batteries at a time**
- Operates for less than 12¢/month
- Automatic pulse desulfation
- Hi/Lo temperature compensation with Auto-Temp Sensor
- Recovers weak batteries
- Includes: Ring Terminal Assembly, Fully-Insulated Battery Clips with 15A Fuse, Permanent Mounting Adapter
- 1 Year 100% Money Back Guarantee
- 10 YEAR "No Hassle" Warranty

* Not for use with Aviation Batteries

** When batteries are connected in parallel using SmarTECHnology Y-Connectors (P/N 2830409, sold separately)

Why Sell BatteryMINDER[®], NOT Battery Tender[®]

Everyone sells Battery Tender and has for 20+ years including Walmart, K-Mart and big-box store chains across the country.

BatteryMINDER is NOT sold everywhere and certainly not at Walmart, K-Mart or any Discount Chain.

Battery Tender does not enforce what the retailer sells it for. As a result their most popular models can be found advertised for more than 25% off the Suggested List (MSRP).

BatteryMINDER DOES enforce and has a firm MAP Policy requiring Resellers to not advertise their prices for BatteryMINDers less than 10% off List (MSRP) *Our dealers compete on service not price.*

Why are BatteryMINDers Better Products?

- **One Year Manufacturer's 100% Money-Back Guarantee**
(Battery Tender has no such guarantee)
- **Five to Ten Year "No Hassle" 100% Parts and Labor Warranty**
(Battery Tender charges for inspection and shipping if product is not found defective)
- **All BatteryMINDers will Maintain Multiple Batteries at a time**
(Only high-end \$\$\$ Battery Tender Gang chargers can do multiple batteries)
- **ALL BatteryMINDers are fully temperature-compensated from freezing to 135°F to prevent over/under charging.**
(Battery Tender units are not fully temperature compensated over this temperature range nor as accurately resulting in potential over/under charging)
- **ALL BatteryMINDers provide automatic Full-Time desulfation to recover deeply discharged batteries as low as 3-Volts.**

YES, BatteryMINDers will likely cost you more, but will give you more margin without ever having a customer find out he could have bought it at a much lower price on the web or at Walmart.
