AT A GLANCE

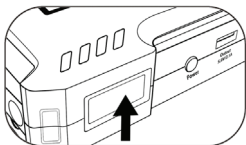

JUMP-STARTING YOUR VEHICLE

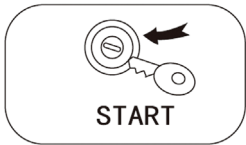

1. Attach the red Jump-starting clamp to the red positive [+] battery terminal, and connect the black clamp to the negative [-] battery terminal.

2. Plug in the jumper cables.

3. Switch on jump-starter and check it is over 50% charged.

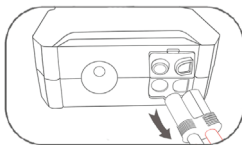

4. Start your engine.

JUMP-STARTING YOUR VEHICLE

For maximum output and product longevity, wait 30 seconds between jump-start attempts.

Unplug the jumper cables within 30 seconds.

- ⚠** Do not connect the red and black clamps together.
- ⚠** If display shows 50% or less, charge jump-starter prior to next use. Failure to do so could result in damage to jump-starter.
- ⚠** Jumper cables must be connected properly to the vehicle's battery terminals. (See your vehicle owner's manual for proper jump-starting procedure.)

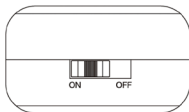

KNOWING THE CABLES

	Steady	Ready to jump-start.
	Steady	Standby. Cables are plugged into the jump-starter and are now ready to be connected to the battery.
	Flashing	<ol style="list-style-type: none">1. Cables are hooked up properly but have not been used for 60 seconds. Please press reset button to be ready.2.
