1	Instructions	9924323

You will need to supply:

10 mm Socket Extension

Torque Wrench

#### **APPROXIMATE ASSEMBLY TIME: 30 minutes**

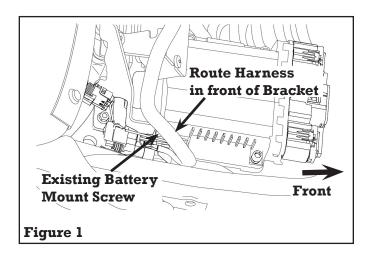

## **INSTALLATION INSTRUCTIONS**

## Removal

- 1. Lift seat valence to access seat retention screws. Remove screw on each side of seat base.
- 2. Slide seat to the rear to remove.
- 3. Unplug heated seat wiring harness (if so equipped).
- 4. Set hardware and seat aside for re-installation.

## Installation

- 1. Remove existing screw from battery mount. See Figure 1.
- 2. Route wiring harness as shown and loosely start screw into threaded hole on vehicle.
- 3. Install existing screw from step 1 back into the hole it came from and other screw into remaining bracket mount hole.
- 4. Starting with the screw under the wiring harness, torque all screws to 90 +/- 9 in.lb (10.2 +/- 1.0 Nm).
- 6. Replace seat and torque seat screws to 18 +/- 2 ft.lb (24.4 +/- 2.7 Nm).

WARNING: Wiring harness must be routed properly or severe damage to your vehicle will occur.

WARNING: Ensure frame tabs are engaged in seat base pockets when installing seat.

WARNING: Re-torque all fasteners after 500 miles.
