

## 20077 – Ranger 400 Floor Mount

(Fits Ranger 400/Electric 2010-current and Ranger 500 2011)

Description	Quantity
Left Plate	1
Right Plate	1
1/4" x 1.00" Truss Head Bolt	4

**NOTE:** This mount is to be used in conjunction with the 20073, UTV Gun Mount. Sold Separately

### UTV Gun Rack Mounting:

- Using the Torx wrench provided in your Polaris 400cc tool bag, remove the (4) 1/4" Torx screws from the floor of the UTV as shown below.

- Take the left plate and attach to the left side holes and using (2) of the 1/4" x 1.00" truss head bolts. Loosely secure to the floor at this point.
- Attach the right plate to the right side floor using (2) 1/4" x 1.00" truss head bolts. Loosely attach as adjustments will need to be made once completely assembled.
- Place the 1.50" tube, from the 20073 kit, in-between the plates and attach using the hardware in the 20073 BOM.
- Follow instructions in the 20073 to finish mounting the UTV Gun Rack to your Ranger floor.
- Once the 20073 is completely installed be sure to tighten all hardware securely, including the floor mount hardware. Failure to do so could result in damage to your weapons.

### UTV Gun Rack Use:

- Place the Gun into the Kolpin UTV Gun Mount and secure with the Rubber strap.
- The UTV Gun Mount is designed to carry your Guns safely and securely from one destination to the next.

**CAUTION:** Always make sure gun is unloaded and pointed in a safe direction before traveling.

**CAUTION:** Check with local authorities to make sure you are able to travel with uncased weapon.
