## Polaris RZR XP1000/2015 900S Rock Sliders (P141220)

### Installation Instructions

- Begin by removing any dirt/obstructions that may interfere with the installation of the rock slider. Make sure all of the mounting holes and surfaces are clear.

- Assemble the supplied expansion anchors [ITEM 1] with the rock slider as shown above. Insert the bolt, washer, and sleeve into the mounting hole first. The flat surfaces of the sleeve of the expansion anchor should fit into the groove in the mounting hole of the rock slider. Then, thread the nut on the back side, against the fingers of the sleeve. The flat surfaces of the nut should fit into the groove in the sleeve and create a snug fit.

- Place the rock slider with the expansion anchors onto the vehicle. Make sure the sleeves of the expansion anchors are still seated properly in the grooves in the mounting holes of the rock slider before you proceed to tighten the anchors. Apply constant inward pressure on anchors as you tighten. It may be helpful for another person to hold the rock slider in place while you go around and evenly torque down the three anchors. **DO NOT OVERTIGHTEN** as you may shear the bolt in the expansion anchor.

- Repeat steps for other side. Installation is now complete.

## **TOOLS REQUIRED**

- 1/4" drive ratchet, 6 in. extension, & 13mm socket.

## **HARDWARE KIT**

ITEM NO.	PART NUMBER	DESCRIPTION	QTY.
1	5337853-PA	TUBE EXPANSION, ANCHOR	6
2	5632958-PA	WEDGE ANCHOR, CAST, THREADED	6
3	7520234	SCR-HXFL-M8 X 1.25 X 30 10.9 ZPB	6
4	7556341	WASHER- .327 X .875 X .90, FL-M	6

**WARNING:** Make sure all hardware and components are secure before operating vehicle. Damage to vehicle can occur from improper installation or poor maintenance.
