

LE BENCH SUSPENSION SEAT INSTALL (P144S191)

1

Start the LE rear bench seat installation by first removing the two OEM rear seats. Reach through the space between top/bottom cushions and press the plastic latch to release seat base and remove from vehicle.

2

Remove four (4) Torx bolts that attach OEM seat to its base. Repeat for opposite seat.

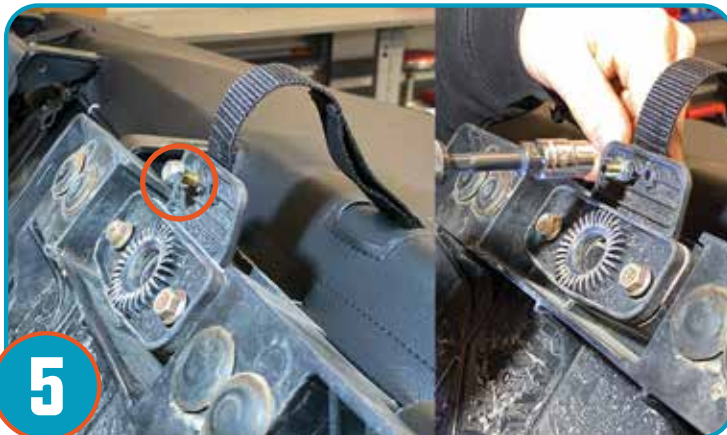

3

Using a 1/4 drill bit widen a single hole on each seat base to allow for bench seat strap attachment for easy seat removal should you have the need to remove seat in future.

4

Apply seat bases removed in step 2 onto the bench seat using the same Torx bolts securing the seat bases to the bench seat. Adjust seat and base forward or back for desired placement/fitment. Repeat for opposite side.

5

Using the provided hardware attach the latch strap to seat bases as shown for both sides of the bench seat. Tighten nut down to secure.

6

Once the release straps and bases has been attached and satisfied with placement, the bench can be placed into vehicle.

PRO ARMOR

EVERY RIDE HAS A STORY

LE FRONT/REAR SUSPENSION SEAT INSTALL (P141S188)

Position the seat base as shown and run the seat belt receivers or Harnesses (depending on whether you have OEM belts or Pro Armor aftermarket harness's) through the slots in bench seat. Click the bench seat in place to secure.

- **Never** stick hands, head or arms outside of vehicle at any time when it is in motion.
