TECHNOLOGY TO

CONQUER THE RIDE.

ELEVATE YOUR RIDE
WITH EXCLUSIVE
TECH54 RIDING GEAR
DESIGNED TO KEEP
YOU WARM AND DRY.

To us, winter is more than just another season. It's when the landscape is frozen by an icy grip and snow transforms terrain into an endless playground. Like you, we savor every minute, which is why our Apparel Center of Excellence developed TECH54—a waterproof, breathable membrane featured in every Polaris jacket, bib and monosuit. This exclusive technology allows perspiration to escape and keeps water out, so no matter how you ride, or where you ride, you stay dry, warm and comfortable.

- Heat and sweat escape
- Water stays out
- Tailored for how you ride
- Stay dry, warm and comfortable

- Choose your TECH54 rating based on the weather conditions and your level of exertion
- Choose **5K/5K** for colder & drier conditions and moderate activity
- Choose **10K/10K** for extremely wet riding conditions and high-activity riding

TECH54 is featured in all Polaris jackets, bibs and monosuits including men's, women's and youth. Look for the TECH54 logo when shopping at your local dealer or online.

- Ideal for sleds in the 136" track range with up to 1 1/4" lugs or shorter track sleds with more than 96 studs

TRACKS

FOUR KEYS TO TRACK SELECTION

LENGTH

The inside circumference of the track is calculated as the drive pitch multiplied by the number of track segments. It must be correct to the nearest inch for proper fit without additional modifications to the skid frame.

DRIVE PITCH

The drive cog center distance around the circumference of the cogs on the drive axle. It must match the existing track or the drive cogs must be changed.

- 2.52" drive pitch primarily machines manufactured before 2007
- 2.86" drive pitch especially on recent models manufactured after 2007
- 3" and new, 3.5" drive pitch for lowest weight on select mountain sleds

WIDTH

The measurement across the track governed by the width of the tunnel.

LUG HEIGHT

The distance lugs extend above the track surface.

- Trail: 1" - <1.5"
- On/Off Trail: 1.5" - <2"
- Deep Snow: 2" and greater

TRAIL

ICE STORM 150

ON TRAIL

OFF TRAIL

• Two-height lug decision offers deep-snow flotation with handlebar-gripping acceleration

• Factory-pre-studded for improved traction and control on icy conditions

• 1.25" outer lugs and 1.5" cup-shaped center lugs provide power and traction on packed trails and turns

POLARIS
ENGINEERED

FOR THE LIFE OF YOUR RIDE, ONLY THE BEST WILL DO.

In the continued pursuit of creating the best oil on snow, we invest in rigorous testing to ensure our oil delivers unrivaled consistency and performance. The result is Polaris Engineered Lubricants that are tested and perfected to deliver excellent total engine protection for the life of your ride.

WHAT COUNTS IN OIL TESTING:

1. Does it protect the engine at low temperatures?
2. Does it protect the engine from high heat wear?
3. Does it keep the engine clean?

PISTON CHECKPOINTS

PISTON DOME: Is it clean? Clean burning oil and our proprietary detergency system prevent carbon buildup and hot spots, which extend piston life and maintain optimal run quality.

PISTON RINGS AND RING LANDS: Are they free of carbon deposits and soot? This is important to preserve ring seal and maximum power output.

PISTON PINS AND NEEDLE BEARINGS: Proper viscosity and lubricity, film strength and our proprietary additives provide exceptional protection and heat control, maintaining proper pin and bearing tolerances and performance.

PISTON SKIRT: Is the GRAFAL® coating scratched or visibly damaged? Harsh contact between the cylinder and piston due to insufficient lubrication would eventually result in engine failure.

*Belt dimensions are given in nominal dimensions. There is a +/- variance for all critical dimensions. Clutch setup must be inspected when a new belt is installed and should be adjusted if necessary. The drive belt is an important component in the CVT system. In order to achieve maximum efficiency from the converter, drive-belt deflection (tension), clutch offset and alignment must be adjusted properly. See your Service Manual for further details on drive-belt measurement inspection.

SERVICE PARTS

POLARIS ENGINEERED SERVICE PARTS DELIVER UNMATCHED PERFORMANCE AND FIT FOR YOUR SLED.

Our engineers at Polaris create snowmobile parts that push the limits of weight versus strength. We build our parts to feel lighter without sacrificing strength and durability. But over time, your sled will eventually need some service. When we're engineering our high-performance components, we keep serviceability in mind. From a quick clutch inspection to a ski alignment, we build our products as a system, so that anyone with the right tools and training can easily maintain their vehicle from their own garage—and get back on the trails where your snowmobile belongs.
