Rear torque arm tunnel mount enclosure kit for 2027 INDY Matryx Cross Country 600

The Polaris Race Dept recommends installing this enclosure for ICE racing. This kit must be purchased directly from the Polaris Race Dept. Kit part number is #0818039 (Kit includes: Left-Hand & Right-Hand Black enclosures)

Use the most forward rear bumper screw to hold the enclosure onto the tunnel/mounting pad. Use the stock RTA bushing and hardware to center the enclosure over the RTA bushing. Once the enclosure is centered mark the mounting pad for the two 1/8” rivet holes to be drilled in the mounting pad/tunnel. Counter sink the pre drilled 1/8” holes in the enclosure and install two 1/8” countersink rivets. Repeat for opposite side.
