

***Rear torque arm tunnel mount enclosure kit for 2026 Indy Matryx Cross Country 600***

The Polaris Race Dept recommends installing this enclosure for ICE racing. This kit must be purchased directly from the Polaris Race Dept. Kit part number is #0818039 (Kit includes: Left-Hand & Right-Hand Black enclosures)

Use the most forward rear bumper screw to hold the enclosure onto the tunnel/mounting pad. Use the stock RTA bushing and hardware to center the enclosure over the RTA bushing. Once the enclosure is centered mark the mounting pad for the two 1/8" rivet holes to be drilled in the mounting pad/tunnel. Counter sink the pre drilled 1/8" holes in the enclosure and install two 1/8" countersink rivets. Repeat for opposite side.
