TRAIL TECH

TTO FAN CONTROLLER
INSTRUCTIONS

CHANGING TEMPERATURE UNITS AND FAN SETTING:

CHANGING TEMPERATURE UNITS AND FAN SETTING:

SETTING MENU

To enter set up menu, press and hold blue button for 3 seconds.
Release when all LCD segments flash on.

SET TEMPERATURE UNIT

Select Fahrenheit or Celsius by pressing blue button.

TEMPERATURE SETTING

After temperature unit is selected, wait 5 seconds and the word
"Hi" will display. Press and hold blue button to increment or
decrement. Arrow in lower left corner indicates direction of
adjustment. The direction of adjustment will change automatically in 3 seconds if button is not pressed. After 3
more seconds the meter will automatically exit setup mode and resume current temperature display.

*Disclaimer: Trail Tech's Fan Kit does not guarantee your vehicle will not overheat. If steam is present or engine
temperature is high, please stop and wait for engine to cool. Overheating may cause engine damage.*
